8 Cottrell CRT, Delahey 3037 | 0426292942 | akif448@gmail.com.au

Full stack web developer and business owner, leveraging a high-pressure technical background to help design and implement a range of products and processes which will streamline and enhance customers online presence, helping reach more consumers. Currently undergoing a coding bootcamp with Monash University having gained newly developed skills in JavaScript, CSS, J.Query, JSON, frameworks and responsive web and application design. Known as someone who thrives under pressure with a passion for developing web applications and constantly gaining new skills, with a focus on web design and application development. I am excited to showcase my skills as part of a quality, pressure-driven team to help businesses develop in the technological world.
